

CIKS/Act1 Polyclonal Antibody

CATALOG #: 3314-100

AMOUNT: 100 µg

LOT #: _____

HOST: Rabbit

IMMUNOGEN: Synthetic peptide mapping to the N-terminus of human CIKS.

SPECIES REACTIVITY: human

FORMULATION:
100 µg (0.5 mg/ml) affinity purified rabbit anti-CIKS/Act1 polyclonal antibody in phosphate buffered saline (PBS), pH 7.2, containing 30% glycerol, 0.5% BSA, and 0.01% thimerosal.

STORAGE CONDITIONS:
Store at -20°C. For long-term storage, aliquot and freeze at -70°C. Avoid repeated freeze/defrost cycles.

BACKGROUND:
CIKS (for connection to IKK and SAPK/JNK), also called Act1 (for NF-κB activator 1), is a novel protein that associates with and activates IKK (IκB kinase). CIKS/Act1 also activates ATF (activating transcription factor) and AP-1 (activator protein 1) through Jun kinase (JNK). CIKS/Act1 is ubiquitously expressed in human tissues.

APPLICATION AND USAGE:
The antibody can be used for Western blotting (0.5-4 µg/ml). However, the optimal conditions should be determined individually.

SPECIFICITY:
The antibody detects the ~63 kDa human CIKS/Act1. Human placenta tissue lysate can be used as a positive control.
