

APG10 Antibody

CATALOG #:	3910-100
AMOUNT:	100 µg
LOT #:	_____
HOST:	Rabbit
IMMUNOGEN:	Synthetic peptide, near the carboxyl terminus of human APG10.
SPECIES REACTIVITY:	human, mouse, rat
FORMULATION:	0.5 mg/ml affinity purified rabbit anti-APG10 in PBS containing 30% glycerol, 0.5 mg/ml BSA and 0.01% thimerosal.
STORAGE CONDITIONS:	Store at -20°C. For long term storage, store at -70°C.

DESCRIPTION:

Autophagy, the process of bulk degradation of cellular proteins through an autophagosomal-lysosomal pathway is important for normal growth control and may be defective in tumor cells. It is involved in the preservation of cellular nutrients under starvation conditions as well as the normal turnover of cytosolic components. This process is negatively regulated by TOR (Target of rapamycin) through phosphorylation of autophagy protein APG1. Another member of the autophagy protein family is APG10 (Also called ATG10, APG10L), an E2-like enzyme involved in two ubiquitin-like modifications essential for autophagosome formation: ATG12-ATG5 conjugation and the modification of a soluble form of MAP-LC3, a homolog of yeast Apg8, to a membrane-bound form. ATG10 has also been shown to interact with ATG12 in human embryonic kidney cells in the presence of ATG7. Multiple isoforms of ATG10 are known to exist.

APPLICATION AND USAGE:

The antibody can be used for Western blotting (0.5-4 µg/ml). However, the optimal conditions should be determined individually. Other applications have not been determined.

FOR RESEARCH USE ONLY! Not to be used in humans.
