

Anti-HA-FITC Monoclonal Antibody

CATALOG #:	3996F-100
AMOUNT:	100 µg
LOT #:	_____
ISOTYPE:	Mouse IgG2b
CLONE#	2C16
IMMUNOGEN:	Synthetic peptide of 76-111 of X47 hemagglutinin 1

FORMULATION:

100 µg (0.2 mg/ml) mouse anti-HA-FITC monoclonal antibody (>90% pure) in phosphate buffered saline (PBS, pH 7.2), containing 50% glycerol, 1% BSA, 0.02% thimerosal.

STORAGE CONDITIONS: Store at -20°C. Avoid repeated freeze/thaw cycles.

BACKGROUND:

Epitope tags are useful for the labeling and detection of proteins using immunoblotting, immunoprecipitation, and immunostaining techniques. The HA tag is derived from an epitope of the influenza hemagglutinin protein, which has been extensively used as a general epitope tag in expression vectors.

SPECIES REACTIVITY:

It is expected that the Anti-HA-FITC monoclonal antibody will react with proteins containing HA-tag from all species.

SPECIFICITY:

The antibody detects HA-tag fused to the C-terminus or N-terminus of targeted proteins in transfected mammalian cells.

APPLICATION AND USAGE:

The Anti-HA-FITC antibody can be used for one-step localization of recombinant HA-tagged proteins by standard immunofluorescence methods (2-10 µg/ml). However, the optimal conditions should be determined individually.

FOR RESEARCH USE ONLY! Not to be used in humans.
