

## Experience Unsurpassed Reproducibility With BioVision's

### Animal Origin Free (AOF) Recombinant Proteins

Scientific reproducibility is often impeded by variability in samples. With BioVision's Animal Origin Free (AOF) proteins, you have one less thing to worry about. We offer a huge range of AOF recombinant proteins expressed from bacteria through fermentation in dedicated fermentors, followed by purification. The production scales can range from milligram to hundreds of grams.

Some advantages of using our AOF proteins:

- Minimized risk of experimental inconsistency caused due to any animal components or pathogens.
- Minimized lot to lot variability leading to enhanced consistency in performance and unrivaled reproducibility.
- Easier purification and downstream processing reduces final processing costs.
- Minimized endotoxin content.
- Consistently high biological activity.
- Ideal for bioproduction and pharmaceutical applications.

Protein categories include Cytokines and Growth factors, Apolipoproteins, Angiostatins, Proteases, and more. Select yours from the list below.
