

Caspase-4 Polyclonal Antibody

CATALOG NO:	3028-30T	30 µg (Trial size)
	3028-100	100 µg
HOST:	Rabbit	
IMMUNOGEN:	Synthetic peptide surrounding amino acid 100 of human caspase-4 (ID# BV-384).	
SPECIES REACTIVITY:	Human, Mouse, Rat	

FORMULATION:

0.2 mg/ml affinity purified rabbit polyclonal antibody in phosphate buffered saline (PBS), pH 7.2, containing 30% glycerol, 0.5% BSA, 0.01% thimerosal.

STORAGE CONDITIONS:

Store at -20°C. For optimal storage, aliquot and freeze at -70°C. Avoid repeated freeze/thaw cycles.

BACKGROUND:

Apoptosis occurs during normal cellular development and involves dramatic changes in cellular structure. Disruption of apoptosis may contribute to cancer as well as other autoimmune diseases. Caspase family of cysteine proteases has been shown to play a key role in apoptosis. Caspase-4 is also known as Ich-2, TX, and ICE_{rel-II} and can proteolytically processed by granzyme B. Over expression of caspase-4 induces apoptosis in Rat-1 and HeLa cells, which can be inhibited by CrmA and Bcl-2.

SPECIFICITY:

The affinity purified antibody detects the 43 kDa proform of caspase-4.

APPLICATION AND USAGE:

Western blot analysis (0.5-4 µg/ml). However, the optimal conditions should be determined individually. Mouse small intestine tissue lysate can be used as a positive control.

FOR RESEARCH USE ONLY! Not to be used on humans.
