

Caspase-7 Polyclonal Antibody

CATALOG NO: 3135-30T 30 µg (Trial size)
3135-100 100 µg

HOST: Rabbit

IMMUNOGEN: Synthetic peptide corresponding to residues surrounding the cleavage site of human caspase-7 large fragment (ID# BV-3).

SPECIES REACTIVITY: Human, Mouse, Rat

FORMULATION:

0.5 mg/ml in phosphate buffered saline (PBS), pH 7.2, containing 30% glycerol, 0.5% BSA, 5 mM EDTA and 0.03% Proclin

STORAGE CONDITIONS:

Store at -20°C. For long-term storage, aliquot and freeze at -70°C. Avoid repeated freeze/thaw cycles.

BACKGROUND:

Caspase-7 is a 34 kDa protein consisting of two subunits and a short prodomain. The procaspase-7 can be activated by cleavage by upstream caspases to form active caspase-7 in apoptosis. Once activated, caspase-7 cleaves many of the same substrates as caspase-3, including poly (ADP-ribose) polymerase (PARP) and sterol regulatory element binding proteins (SREBPs).

SPECIFICITY:

The antibody detects the full length (35-37 kDa) and the large fragment (20-25 kDa) of processed caspase-7 by Western blotting. Mouse small intestine tissue lysate can be used as a positive control. Blocking peptide (Cat.# 3136BP-50) is also available separately.

APPLICATION AND USAGE:

The antibody can be used for Western blot analysis (0.5-4 µg/ml). However, the optimal conditions should be determined individually.

FOR RESEARCH USE ONLY! Not to be used on humans.
