

Active Caspase-6 Polyclonal Antibody

CATALOG #: 3156-100

AMOUNT: 100 µg

LOT #: _____

HOST: Rabbit

IMMUNOGEN: Synthetic peptide surrounding amino acids mapping to the C-terminus of the large fragment of human caspase-6.

SPECIES REACTIVITY: Human, Mouse, Rat

FORMULATION:

100 µg (0.5 mg/ml) affinity purified rabbit anti-active caspase-6 polyclonal antibody in phosphate buffered saline (PBS), pH 7.2, containing 30% glycerol, 0.5% BSA, 0.01% thimerosal.

STORAGE CONDITIONS:

Store at -20°C. For long-term storage, aliquot and freeze at -70°C. Avoid repeated freeze/thaw cycles.

BACKGROUND:

Caspase family of cysteine proteases has been shown to play a key role in apoptosis. Similar to other caspases, caspase-6 is also synthesized as an inactive pro-enzyme that is processed in cells undergoing apoptosis. Together with caspase-3, caspase-6 is one of the major caspases in apoptotic cells, and functions downstream of apoptosis inhibitors Bcl-2 and Bcl-xL. Caspase-6 has also been shown involving in the proteolysis of poly (ADP-ribose) polymerase (PARP) and nuclear lamin A.

APPLICATION AND USAGE:

The antibody can be used for Western blotting (0.5-4 µg/ml) and immunofluorescence (Ref. Nikolaev A. et. al., *NATURE*, Vol. 457, Page 981-989, 2009). However, the optimal conditions should be determined individually.

SPECIFICITY:

The antibody detects the large subunit (18 kDa) of the active caspase-6. The antibody does not recognize other caspases.

FOR RESEARCH USE ONLY! Not to be used in humans.
