

Caspase-8 Polyclonal Antibody

CATALOG NO:	3158-30T	30 µg (Trial size)
	3158-100	100 µg
HOST:	Rabbit	
IMMUNOGEN:	Synthetic peptide surrounding the cleavage site of human Caspase-8 (ID# BV-006)	
SPECIES REACTIVITY:	Human	

FORMULATION:

0.5 mg/ml affinity purified rabbit anti-caspase-8 polyclonal antibody in phosphate buffered saline (PBS), pH 7.2, containing 30% glycerol, 0.5% BSA, 0.01% thimerosal.

STORAGE CONDITIONS:

Store at -20°C. For long term storage, aliquot and freeze at -70°C. Avoid repeated freeze/thaw cycles.

BACKGROUND DESCRIPTION:

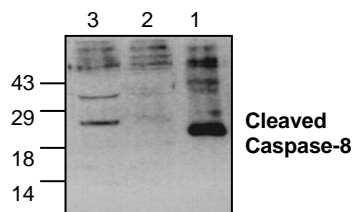

Caspase family of cysteine proteases has been shown to play a key role in apoptosis. Caspase-8 is a 55 kDa cytosolic protein that is synthesized as an inactive pro-enzyme. Activation of caspase-8 involves a two-step proteolysis: the cleavage of caspase-8 to generate a 43 and a 12 kDa fragment which is further processed to 10 kDa. The p43 is then cleaved to yield p26 and the release of the active site containing p18.

SPECIFICITY:

The affinity purified antibody mainly detects the 26 kDa fully cleaved fragment and the 35-43 kDa intermediate of caspase-8 in apoptotic samples.

APPLICATION AND USAGE:

The antibody can be used for Western blotting (0.5-4 µg/ml). Based on researchers feedback, it can also be used in immunohistochemistry (10-20 mg/ml). However, the optimal conditions should be determined individually. Blocking peptide (Cat.# 3158BP-50) is available separately.

Cat.# 3158-100

Western blot analysis of Caspase-8.
Lane 1: Recombinant h-caspase-8;
Lane 2: Untreated Jurkat cells;
Lane 3: Camptothecin induced cells.

FOR RESEARCH USE ONLY! Not to be used on humans.
