

# Caspase-6 Polyclonal Antibody

**CATALOG NO:** 3256-30T 30 µg (Trial size)  
3256-100 100 µg

**HOST:** Rabbit

**IMMUNOGEN:** Synthetic peptide mapping to the C-terminus of rat caspase-6 large fragment (ID# BV-24)

**SPECIES REACTIVITY:** Human, Mouse, Rat

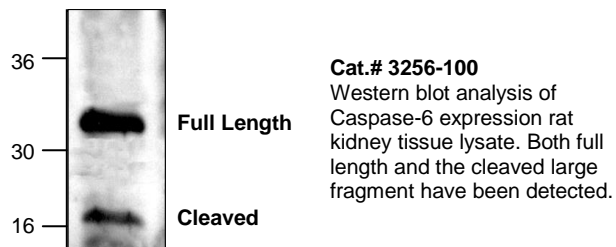

**FORMULATION:**  
0.2 mg/ml rabbit anti-caspase-6 polyclonal antibody in phosphate buffered saline (PBS), pH 7.2, containing 30% glycerol, 0.5% BSA, 0.01 thimerosal.

**STORAGE CONDITIONS:**  
Store at -20°C. For long-term storage, aliquot and freeze at -70°C. Avoid repeated freeze/thaw cycles.

**BACKGROUND:**  
Caspase-6 is one of the major executioner caspases functioning in cellular apoptotic processes. Similar as other caspases, caspase-6 is also synthesized as an inactive pro-enzyme that is processed in cells undergoing apoptosis. Caspase-6 has also been shown involving in the proteolysis of poly (ADP-ribose) polymerase (PARP) and nuclear lamin A.

**SPECIFICITY:**  
The antibody detects a full length (35 kDa) and the cleaved fragment (18 kDa) of caspase-6. Blocking Peptide is available separately (Cat.# 3256BP-50).

**APPLICATION AND USAGE:**  
The antibody can be used for Western blotting (0.5-4 µg/ml) and Immunohistochemistry (5 µg/ml). However, the optimal conditions should be determined individually. Jurkat cell lysate (Cat.# 2401-100), mouse intestine (Cat.# 2601-100), and rat kidney (Cat. 2702-100) tissue lysate can be used as a positive controls.

**FOR RESEARCH USE ONLY! Not to be used on humans.**
