

Active Caspase-8 Polyclonal Antibody

CATALOG NO:	3259-30T	30 µg (Trial size)
	3259-100	100 µg
HOST:	Rabbit	
IMMUNOGEN:	Synthetic peptide corresponding to residues surrounding amino acid 392 of mouse caspase-8 (ID# BV-9).	
SPECIES REACTIVITY:	Mouse, Rat	

ANTIBODY FORMULATION:

0.5 mg/ml affinity purified rabbit polyclonal antibody in PBS containing 50% glycerol, 0.5% BSA, and 0.01% thimerosal.

STORAGE CONDITIONS:

Store at -20°C. For long term storage, aliquot and refreeze at -70°C. Avoid repeated freeze/thaw cycles.

DESCRIPTION:

Caspase-8, a member of the caspase-family of proteases, plays a key role in mediating Fas (CD95) and TNF induced apoptosis. Caspase-8 is synthesized as inactive pro-enzyme and activation of the enzyme involves proteolytic cleavage that leads to the release of the active p18 and p10 subunits. Activated caspase-8 is able to cleave and activate downstream caspases, such as caspase-3, -6, -7 and a death agonist member of the Bcl-2/Bcl-xL family, Bid, leading to apoptosis.

SPECIFICITY:

The antibody detects the 25 kDa large subunit of caspase-8. It does not detect the full-length of caspase-8.

APPLICATIONS AND USAGE:

The antibody can be used for Western blotting (0.5-4 µg/ml) in samples from mouse and rat origins. However, the optimal conditions should be determined individually.

Cat.# 3259-100

Western blot analysis of caspase-8 expression in mouse intestine and rat kidney tissue lysate

FOR RESEARCH USE ONLY! Not to be used on humans.
