

r-Cytochrome c Polyclonal Antibody

CATALOG NO: 3352-30T 30 µg (Trial size)
3352-100 100 µg

HOST: Rabbit

IMMUNOGEN: Rat cytochrome c

SPECIES REACTIVITY: Rat

FORMULATION:

0.2 mg/ml affinity purified rabbit anti-Cytochrome c polyclonal antibody in phosphate buffered saline (PBS), pH 7.2, containing 30% glycerol, 0.5% BSA, 0.01% thimerosal.

STORAGE CONDITIONS:

Store at -20°C. For long-term storage, aliquot and freeze at -70°C. Avoid repeated freeze/thaw cycles.

BACKGROUND:

Cytochrome c (m.w. 12,500) is an electron transport protein from mitochondria. It is released from mitochondria to cytoplasm during the early stages of apoptosis, prior to caspase activation, DNA fragmentation, and loss of membrane potential. The cytoplasmic cytochrome c is associated with Apaf-1 and caspase-9 to activate caspase-3 and other caspases.

SPECIFICITY:

The cytochrome c antibody detects the 12 kDa cytochrome c from rat samples.

APPLICATION AND USAGE:

The antibody can be used for Western blotting (0.5-4 µg/ml). However, the optimal conditions should be determined individually. Rat kidney lysate (Cat.# 2702-100) can be used as a positive control. Blocking peptide for this antibody is also available (Cat.# 3352-50BP).

FOR RESEARCH USE ONLY! Not to be used on humans.
