

Cox-4 Polyclonal Antibody

CATALOG NO:	3638-30T	30 µg (Trial size)
	3638-100	100 µg
HOST:	Rabbit	
IMMUNOGEN:	Synthetic peptide surrounding amino acid 32 of human Cox IV (ID# BV-101)	
SPECIES REACTIVITY:	Human, Mouse, Rat	

FORMULATION:

0.2 mg/ml affinity purified rabbit polyclonal antibody in phosphate-buffered saline (PBS) containing 30% glycerol, 0.5% BSA, and 0.01% thimerosal.

STORAGE CONDITIONS:

Store at -20°C. For long term storage, aliquot and freeze at -70°C. Avoid repeated freeze/thaw cycles.

DESCRIPTION:

Cytochrome *c* oxidase (COX) is a 13-subunit complex spanning the inner mitochondrial membrane and responsible for the terminal reduction of dioxygen to water in the electron transport chain. The three core catalytic units COX-1, -2, -3 are trans-membrane proteins encoded by the mitochondrial genome, whereas the remaining 10 subunits are nuclear encoded and expressed in a tissue-specific manner. The expression of nuclear and mitochondrial subunits of the mitochondrial respiratory chain is thought to be highly coordinated. Cox-4 is believed to regulate COX activity according to the extramitochondrial ATP/ADP ratio.

APPLICATION:

The antibody can be used for Western blotting (0.5-4 µg/ml) and in Immunohistochemistry (2.5 µg/ml). However, the optimal concentrations should be determined individually.

Cat. # 3638-100
Western blot analysis of Cox-4 expression in Jurkat cell lysate (Lane 1), and mouse small intestine tissue lysate (Lane 2)

FOR RESEARCH USE ONLY! Not to be used on humans.
