**7938-50**      **ToxOut™ Endotoxin-free Water, 10 ml × 5 vials**

---

**I. Description:**

Endotoxin is the lipopolysaccharide (LPS) complex located in the outer membrane of gram-negative bacteria. During experimental procedures, large amount of endotoxins are shed and can easily contaminate labware, buffers and downstream products. Presence of endotoxin in any of these has a detrimental effect on culturing of cells and can lead to generation of irreproducible or negative experimental data. Therefore, it is critical to keep endotoxin away from samples and products.

**ToxOut™ Endotoxin-free Water** is recommended to use for samples with special requirement of endotoxin level (< 0.05 EU/ml).

**II. Storage and Handling:**

- Store at room temperature.
- Handle endotoxin free water with extra caution to prevent endotoxin contamination from dust, solution or dirty labware.

**III. Shelf Life:**

ToxOut™ Endotoxin-free water expires 2 months after opening.
