

Anti-SARS-CoV-2 NP Antibody (Clone# 6F10)

rev 09/20

CATALOG NO.: A2060-50 (50 µg)

BACKGROUND DESCRIPTION: Coronaviruses (CoV) are a large group of enveloped positive-sense RNA viruses. They belong to subfamily *Coronavirinae*, in the family of *Coronaviridae*, of the order of *Nidovirales*. The Coronavirus genome is about 30 kb in length and encodes four structural proteins, namely, spike (S), envelope (E), membrane (M) and nucleocapsid (N), multiple non-structural proteins and other accessory proteins. Coronaviruses infect humans as well as a number of mammalian and avian species. Of the six Coronaviruses that infect humans, SARS-CoV and MERS-CoV cause severe respiratory disease in humans. SARS-CoV-2 is a novel strain of Coronavirus, deadlier than SARS and MERS-CoV and researchers are aiming to identify anti-viral targets and develop drugs and vaccines to inhibit replication of SARS-CoV-2.

ANTIBODY TYPE:	Monoclonal
CLONE:	6F10
HOST/ISOTYPE:	Mouse / IgG
IMMUNOGEN:	Synthetic peptide targeting amino acids 300-400 of SARS-CoV-2 nucleoprotein
MOLECULAR WEIGHT:	50 kDa
PURIFICATION:	Purified from ascites by Protein G column, > 95% based on SDS-PAGE
FORM:	Liquid
FORMULATION:	In 0.01 M Tris-HCl, pH 8.0, 0.15 M NaCl, 0.02% sodium azide
STORAGE CONDITIONS:	Store at -20°C. Product is stable for 6 weeks at 2 - 8°C as undiluted liquid. Prepare fresh dilutions for every new experiment. Avoid freeze / thaw cycles
APPLICATIONS AND USAGE:	WB 0.1-1 µg/ml, Indirect ELISA 0.2-2 µg/ml as detecting antibody, Sandwich ELISA 2 µg/ml

This information is only intended as a guide. The optimal dilutions must be determined by the user
