**DESCRIPTION:** Artesunate is a semisynthetic derivative of artemisinin. It acts on the electron transport chain, generates local reactive oxygen species, and causes the depolarization of the mitochondrial membrane. It inhibits TNF $\alpha$ -induced production of proinflammatory cytokines via inhibition of NF- $\kappa$ B and PI3 kinase/Akt signal pathway in human rheumatoid arthritis fibroblast-like synoviocytes. Displays cytotoxic action against cancer cell lines of different tumor types. Also induces ferroptosis.

**HANDLING:** Do not take internally. Wear gloves and mask when handling the product! Avoid contact by all modes of exposure.
