

## DiscoveryPak™ Stem Cell Fate Regulator Set V

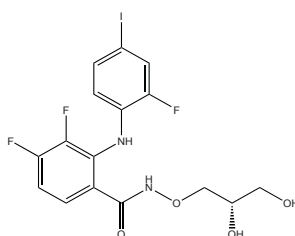

A convenient set of five small molecules useful for generating human induced pluripotent stem cells (iPSC) from primary cells.

The five products are shown in the following table:

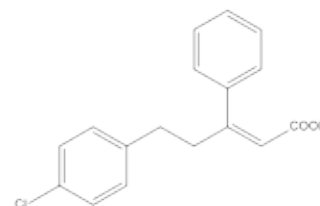

Product	Biological Activity	Cat. No.	Size
<b>A83-01</b>	ALK5 inhibitor	1725-1	1 mg
<b>PD-0325901</b>	MEK inhibitor	1643-2	2 mg
<b>PS48</b>	PDK1 activator	1869-5	5 mg
<b>Sodium Butyrate</b>	HDAc inhibitor	1609-1000	1 g
<b>Tranlycypromine hemisulfate (Parnate)</b>	Lysine-Specific Demethylase 1 (LSD1) inhibitor	1816-25	25 mg

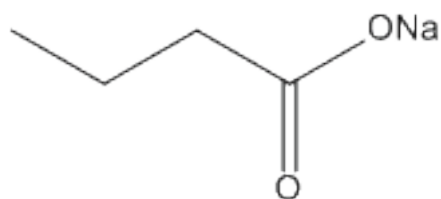

**A83-01**

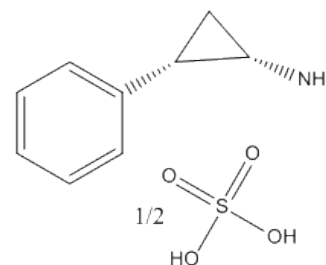

**PD 0325901**

**PS48**

**Sodium Butyrate**

**Tranlycypromine hemisulfate (Parnate)**
